RESEARCH

Digital Technology, Teen Leisure, and Parental Investment In progress
Identifies a leisure demand system for teenagers from time-diary data in the PSID Child Development Supplement. The project will embed it in a model of parents' time and money investment decisions.

Replication: Caucutt and Lochner (2020), “Early and Late Human Capital Investments, Borrowing Constraints, and the Family” 2026
Reimplemented the model in Julia and R using updated computational methods, substantially improving runtime.
